SCHEDULE PROPOSAL FOR ASSISTANT ADMINISTRATOR

TODAY'S DATE: May 08, 2015

Requesting Office: NCEA/ORD

Event /Meeting: Briefing for the ORD Assistant Administrator on Development of the Particulate Matter (PM) Integrated Review Plan (IRP), and an Overview of Recent Diesel Engine Exhaust and Lung Cancer Issues.

Deliberative Process / Ex. 5

Background: Prior to initiating a National Ambient Air Quality Standard (NAAQS) review, NCEA collaborates with OAQPS to develop an IRP, which provides a timeline, scope, and the policy-relevant questions that will form the basis of the review. In light of the International Agency for Research on Cancer (IARC) concluding that PM is a Class I Human Carcinogen, it is important for NCEA to clearly articulate the scope of the ISA, especially considering the study inclusion criteria may differ between the two assessments.

In EPA's 2002 Health Assessment Document for DE, the Agency concluded that DE was "likely to pose a lung cancer hazard to humans", but scientific evidence was not sufficient to conduct a quantitative risk assessment (QRA). In 2012, three studies were published that examined the relationship between diesel exhaust exposure and lung cancer (i.e., the Diesel Exhaust in Miners Study [DEMS] by Attfield et al. and a nested case-control study within DEMS by Silverman et al., and a study in Trucking Industry Workers by Garshick et al.). At the request of industry and the EPA, HEI convened an expert panel to review the new epidemiology studies to determine their suitability for conducting a QRA.

Date: June 15 – 26, 2015, in advance of NCEA developing the PM IRP and the release of the HEI panel report, which is targeted for the end of 2015.

Time (Duration): 45 minutes

Timing of Assistant Administrator's Attendance: 45 minutes

Location: DC and RTP, via videoconference

Participants: Because of the cross-Agency implications of any decision on DE we are inviting key OAR management to participate with ORD in this briefing.
